1941

BOROUGH OF FAVERSHAM

# ANNUAL REPORTS

OF

## CHARLES J. EVERS, M.D.

Medical Officer of Health

AND

## GEORGE G. CULMER

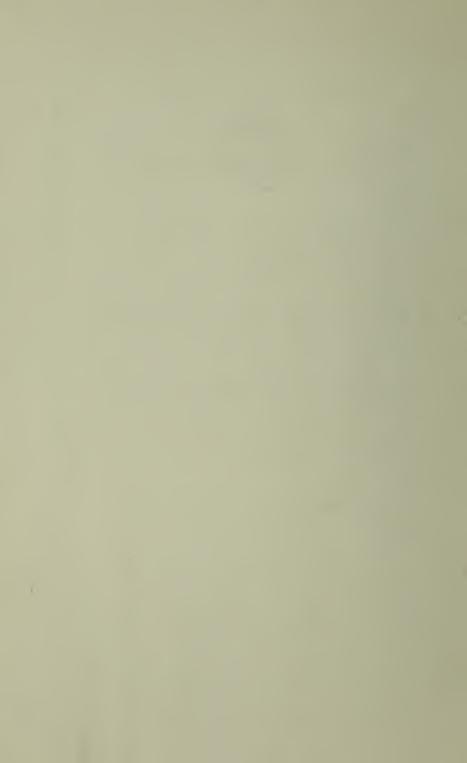

Sanitary Inspector

FOR THE

YEAR ENDING 31st DECEMBER, 1941

Voile & Roberson, Faversham.

1942

### BOROUGH OF FAVERSHAM

# ANNUAL REPORT

OF

### MEDICAL OFFICER OF HEALTH

For the Year 1941

TO THE MAYOR, ALDERMEN, AND COUNCILLORS OF THE BOROUGH OF FAVERSHAM.

I have now the honour to submit to you my Annual Report for 1941 on the Health Conditions of the Borough. There are no special features to comment upon. The amount of Infectious Disease was small; the usual Influenza appeared in the spring; it was rather mild, and few deaths were certified as due to it.

#### PUBLIC HEALTH OFFICERS

The same officials are carrying on.

### NATURE AND CONDITION OF THE AREA

Area of the District in Acres: 3,070.

## PHYSICAL FEATURES AND GENERAL CHARACTER OF THE AREA

These remain unchanged.

The traffic in the Creek has been interfered with by the war to some extent, especially that from abroad, which has practically disappeared.

Rateable Value of the Borough ...  $\pounds 70,676/0/0$ Sum represented by a penny rate ...  $\pounds 272/1/7$ 

## VITAL STATISTICS

#### BIRTHS

There were 163 live births registered during the year—91 males and 72 females. This gives a Birth-rate of 14.3 per 1,000 of the estimated population—the average of England and Wales being 14.2. This is more than in 1940, when the total number was 139. There were 16 illegitimate births (boys 10, girls 6); none of these children died. There were 4 still births registered (2 male and 2 female); one of these was illegitimate.

#### DEATHS

The number actually registered was 255. From this must be deducted the deaths of 109 persons who belonged to other districts. On the other side we must add 19 deaths in other districts that must be ascribed to this district, as follows:—

Chartham Mental Hospit	al					4
	•••					5
	•••	•••	•••		•••	4
Other Districts	• • •	•••	• • •		• • •	3
Tuberculosis Sanatoria	• • •	• • •	•••	•••	•••	3
						19

There were 154 deaths in Public Institutions in the district—135 in Bensted House, 8 in the Cottage Hospital, and 11 in the Nursing Homes. There were 4 deaths of children under one year of age, and 152 of persons of the age of 65 and upwards.

The result is a net total of 165 deaths. This gives for the Borough a Death-rate for the year 1941 of 14.5, which is above the average for the whole kingdom, which is given as 12.9, but lower than in 1940.

#### INFANTILE MORTALITY

The number of deaths under one year of age was 4 (all females), as against 8 in the previous year. This gives a ratio of 24.5 per 1,000 births, against 28 in 1940. The average for the whole country is 59.

One illegitimate infant died during the year.

#### HEALTH SERVICES

These are the same as in previous Reports.

#### AMBULANCE FACILITIES

The Ambulance Service has been maintained at its usual high state of efficiency on the same lines as in 1940.

The personnel have given an immense amount of time to Civil Defence work, which, as during the past two or three years, is additional to their usual activities.

Patients removed							396
Road Accidents	• • •	•••	• • •	•••	• • •	•••	
Other Accidents Total Mileage	•••	• • •	• • •	•••	•••	•••	
Total Milleage							7.373

In addition to their Transport work, the members of the Nursing Division have made numerous attendances at the Hospital and the various School, Welfare and Maternity Clinics throughout the year.

## MATERNITY AND NURSING HOMES

There are two private Nursing Homes in the Borough, which are licensed for the reception of Maternity Cases.

#### MATERNITY AND CHILD WELFARE CENTRE

This has been established for some years and is held at the Gospel Hall, having been open 62 days. Three hundred and sixty-four children are in regular attendance.

An Ante-natal Clinic is held on Tuesdays, and has had a total of 118 attendances, and was open 12 times. Sixty-three mothers attended.

### TREATMENT CASES AND HOME NURSING

These remain as before.

LOCAL ACTS, ADOPTIVE ACTS AND BYELAWS No alteration.

#### WATER SUPPLY

As in my last Report.

Samples taken:-

Chemical Analysis—Public Su Wells	ipply			$\frac{3}{2}$
Bacteriological Tests—Public All with satisf	Supply	•••	•••	6

#### SEWERAGE AND SEWAGE DISPOSAL

The sewerage and sewage disposal arrangements are as in my last Report; no further deep sewers have been laid down.

The conversion of Privies into Water Closets with flushing cisterns		The conversion	of	Privies	into	Water	Closets	with	flushing	cisterns
---	--	----------------	----	---------	------	-------	---------	------	----------	----------

is proceeding also.

Number of Houses in the Borough		 3727
Number of Fresh-water Closets		3606
Number of Privies (movable receptacle	es)	
Number of Privies (fixed receptacles)		 10
Conversions into Water Closets		ő

#### HOUSE REFUSE AND SCAVENGING

Same as last year.

#### OFFENSIVE TRADES

None.

#### HOME WORKERS

Very little; two lists of out-workers sent in.

#### COMMON LODGING HOUSES

As before.

#### **FACTORIES**

	of premises on	the R	egister	:			
	with power	• • •	•••				40
Factories	without power	r	•••		•••	• • • •	41
							81

The occupations carried on in these places show no change from

previous reports.

These have all been regularly inspected, and kept up to a proper standard of cleanliness and ventilation and provision of proper sanitary conveniences, and overcrowding has been prevented.

#### SCHOOLS

The five Schools in the Borough remain as before in their situations and sanitary arrangements.

#### MEDICAL INSPECTION AND TREATMENT

Regular inspection, as required by the Board of Education, has been carried out on the children entering school, and also at the ages of 8 and 13. Re-examinations and special examinations have also been made as necessary, the total number of children examined amounting to 1,005.

The School Clinics and their arrangements have been continued

throughout the year on the same lines as previously.

Statistics of work done:—				
Tonsils and Adenoids-Operated on				20

#### SUPPLY OF MILK

This has been carried on by the Education Committee. All children that need milk are having it—many twice a day.

#### NUTRITION

The Nutrition Survey has been continued and records kept of under-nourished children; the results are very encouraging.

A.R.P. Shelters have been provided.

#### HOUSING

See Sanitary Inspector's Report.

#### MILK SUPPLY

The milk supply of the Borough was formerly obtained chiefly from outside its boundaries, but the enlargement of the area has now included some of these sources within the Borough itself. We have now:—

Producers of Milk					6
Retail Purveyors	•••			•••	10
Registered Premises	• • •	•••	•••	•••	15
Samples sent for examination					-26

#### **SLAUGHTERHOUSES**

There were 8 in the Borough; but 7 were discontinued for the duration of the war.

Details of Meat Inspection are given in the Sanitary Inspector's Report.

#### **BAKEHOUSES**

No change from last Report.

#### RAG FLOCK ACTS AND FOOD AND DRUGS ACT

Same conditions as in 1938.

### WORKING OF SHOPS ACT, 1934

Inspection under this heading has been limited, as the Inspector has been absorbed into A.R.P. duties.

No complaints have been received under the Acts.

#### INFECTIOUS DISEASE

The amount of Influenza during the past year was about as usual and of a moderate type; 4 deaths have been attributed to it. The total number of notifications is more than in 1940, viz.: 459, as against 52.

This increase is entirely due to epidemics of Measles and Whooping Cough, both of which were made notifiable. Fortunately, no deaths from them are recorded.

Our arrangements for dealing with infection are the same as previously.

Specimens sent to County Laboratory:

			P	ositive	Negative
		53		3	50
		43		9	34
•••		3		1	2
		16		3	13
		115		16	99
	•••	•••	43 3 16	53 43 3 16	$\begin{array}{cccccccccccccccccccccccccccccccccccc$

There were 459 cases of infectious disease notified under all headings in 1941, as against 52 in 1940. Of these, 27 cases were removed to Isolation Hospitals. These are classified as follows:—

	Not	tified	Remo	oved

There were 8 deaths from Pneumonia and 9 deaths certified from Pulmonary Tuberculosis. I received during the year 14 notifications under Form 1, and 13 under Form 2.

No action has had to be taken under the Public Health (Prevention of Tuberculosis) Regulations, 1925, or under the Public Health Act, 1925, Section 62.

No case of Tuberculosis has been found not to be notified; it has not been found necessary to take any action in this direction. No action has been taken for disinfestation of Bugs.

#### ANTI-DIPHTHERIA IMMUNISATION

A scheme for this was drawn up and set in action with the co-operation of the local medical men, and proved very successful; by the end of the year over 1,300 children had been immunised and arrangements have been made for continuation of the process. I am much indebted to the personnel at the Mount F.A.P. for their help and co-operation. As susceptibility to Diphtheria is highest in the early years of life, I must strongly impress upon parents the desirability of having their children immunised at the age of one year, which can be done free of charge to them.

#### INSPECTION

During the year I have made routine inspections of the various premises that come under my powers, and special visits as occasion arose.

The F.A.P. at the Mount and the Cottage Hospital have been kept in readiness for the reception of Casualties due to Air Raids and other enemy action.

The details of the various premises to be inspected and the work done in connection therewith are set out fully in the Report of the Sanitary Inspector, and it is, therefore, unnecessary for me to recapitulate them.

In concluding my Report, I have to acknowledge the consideration always shown to me by the Council and valuable help received from my brother officials.

CHARLES J. EVERS, M.D., Medical Officer of Health.

June, 1942.

#### BOROUGH OF FAVERSHAM

# SANITARY INSPECTOR'S REPORT

For the Year Ending December 31st, 1941

TO THE MAYOR, ALDERMEN, AND COUNCILLORS OF THE BOROUGH.

Your Worship and Gentlemen,-

The Minister of Health has intimated that reports for 1941 shall contain only essential matters. The following brief Report is submitted covering the principal items of Sanitary Inspector's work during the year.

#### HOUSING

Representations were made under Section 11 of the Housing Act, 1938, in respect of 8 houses at Whiting's Square, Ospringe Street, and 3 houses in West Street. After consideration the Council made Demolition Orders on each of the houses.

Two houses in Water Lane, Faversham (previously represented), have been demolished by the owners.

No routine inspections of houses were made under the regulations owing to the restrictions on materials. A large number of inspections, however, were made in investigating complaints, and in connection with closet accommodation and the provision of flushing eisterns.

Twenty-nine Statutory Notices were served under the Public Health Act, and in one instance the Council carried out the work in default of the owner.

#### INFECTIOUS DISEASES

The usual enquiries were made in connection with notified cases, and 58 rooms disinfected for various reasons.

#### WATER

Five samples of water were submitted to the County Analyst for chemical analysis, including three from the Public Supply. The reports received showed the water to be of good or excellent organic quality. In addition, six samples were taken from the Public Supply for bacteriological examination, all of which gave satisfactory results.

#### MEAT AND FOODS

The system of centralised slaughtering under the Government scheme has continued to work satisfactorily throughout the year, thus assisting meat inspection and the control of "doubtful" animals.

#### MEAT REGULATIONS

The particulars of work under the regulations, summarised for the year, are:—

#### ANIMALS INSPECTED

Beasts							435
Cows			••• .	• • •	•••	•••	153
	and Lai	nbs	•••	• • •	•••	• • •	3756
Calves	•••	• • •	•••	•••	•••	•••	431
Pigs	•••	•••	•••	•••	•••	•••	381
			W-4-1				F1 F C
			Total			• • •	5156

Five hundred and thirty-six inspections were made at the slaughterhouses, and 269 inspections at meat, fish, and other food shops.

The total amount of meat and organs surrendered on account of disease or unsound conditions was 8,020lbs. Other food inspections resulted in the surrender of 412lbs. of meat products, 193lbs. of fish, 1,724 eggs, and 287 tins of evaporated milk, making a total weight of 9.080lbs.

The number of animals found wholly or partly diseased was 383, while 50 per cent. of the total weight of meat and organs surrendered was on account of tuberculosis.

## PARTICULARS OF CARCASES INSPECTED AND CONDEMNED
